

Introducing **Mini SATA2** solution with the **2009 New MSATA2 series** which are flexible cables and low-profile connectors that are simple to route and install. The slim features improve the thermal design and facilitate elegant placement in **tight space**. The available latch enhances fastening. The quick turnaround and customization bring higher value to **tight schedule**. In addition, competitive pricing fits your **tight budget**.

### Features:

- Our low-profile design with an industry leading **shortest connector 12mm** as the name of "**Mini SATA2**" implies is indeed incorporated to support more aggressive mechanical design.
- Our flexible material allows the cable to be folded with a **radius bend less than 5mm**.
- Our **Halogen Free** UL21425 28 AWG "**Mini SATA2**" cable has a **1.22mm thickness** comparing to the 2.20mm thickness of the 26 AWG SATA cable in the market.
- Our **6.3mm slim width** conserves space and maximizes airflow.
- Our **light weight** of **14.3g/meter** lightens the heavy burden on elegant cable management.
- Achieving the **signaling rate** of **3 Gbps** for SATA2 specification and industry standard.
- The **insertion loss** is down to **zero** and no flimsiness

### Performance Test Data is shown as below
